Warranty and Liability Limitations

All analyses reported by Biogenetic Services, Inc. are based on a representative sample provided by our customers. Therefore, the results provided are representative only of the sample analyzed at a particular point in time. Biogenetic Services, Inc. makes no warranties, expressed or implied including warranty of ability to market a commodity or product based on analytical results provided by BGS. Liability for damage for any cause, including breach of contract or agreement (including estimated turnaround time), breach of warranty and negligence with respect to a test result is limited to a refund of the price of testing the sample. This remedy is exclusive and in no event shall BGS or any of its employees be held liable for any incidental or consequential damages including loss of sale or profits by our customers or their clients.

BSE Resistance Sample Shipping Instructions

DNA Genotyping (e.g. BSE Resistance, Scrapie Resistance, paternity testing, meat product tracing, etc.)
Analysis of Cattle, Sheep, Goat, Swine, Horse, Bison etc.

Blood Samples: Blood tubes

1. Collect at least 2cc of whole blood (not serum) in an EDTA (purple top) blood tube. The purple top tube has an anticoagulant to keep the blood from clotting. The blood in the tube must be mixed thoroughly by inverting 5–10 times. Label tube.
2. Use a new needle/syringe for each animal. Contaminated/mixed blood samples may result in invalid typing.
3. Place protected blood samples, packing slip, ice/gel pack and payment into a padded container.
Samples should not be frozen.
4. It is preferable to ship the samples at the beginning of the workweek to avoid sitting in transit over a weekend. If blood is collected late in the week it may be stored in a refrigerator and shipped as soon as possible. Second day shipping by U.S. Postal Service Priority Mail, Federal Express or UPS is appropriate.
5. Samples should be shipped within 7 days of collection. However, if longer storage is required, the DNA and the quality of the results will not be negatively affected.

Blood Samples: TEGO™ Ear Blood Collection Kits

1. Insert TEGO™ adapter pin into ear tagging applicator. Kit is compatible with Allflex® Total Tagger and Allflex® Retract-O-Matic™ ear tagging applicator; requires use of adapter pin in kit.
2. Place the kit into the ear tagging applicator.
3. Position applicator with kit over the animal's ear targeting the vein – rich area, then clamp.
4. Release the ear tagging applicator, leaving the kit attached to the ear for passive blood collection (about 10-20 seconds).
5. Remove the kit from the ear by holding kit and pulling up.
6. Slide the blood collection card from the holder, and place it almost entirely into the sample envelope.
7. Label the exposed end of the card. After inserting the entire card into the envelope, place folded-over envelopes into a mailing envelope and mail to Biogenetic Services, Inc.
8. TEGO™ Ear Blood Collection Kits and current prices including shipping costs can be obtained directly from Biogenetic Services, Inc. by calling 1-605-697-8500.

Acceptable payment methods: Payment should be included with samples shipped in the USA. Payment must be received before work commences, unless other arrangements have been formally agreed to. We accept VISA and MasterCard. Payment for all other contracts must be received by credit card, wire transfer (preferred), money order or certified check before work commences.

Credit Card Payment: (Circle type): MasterCard or VISA (you may call or fax in this information)
